Financial Justifications for the numbers I have assumed

Stage: Seed

Model: Asset-Light / Q-Comm First / Gen-Z Focused

---

1. Financial Dashboard

All numbers are annualized based on Year 1 projections.

Metric	Value	Notes
Projected GMV (Year 1)	**₹ 20.36 Crores**	Total Gross Merchandise Value (Sales @ MRP).
Net Revenue (Realized)	**₹ 7.94 Crores**	~39% Realization (After Tax, Q-Comm Margins, Promos).
Exit Run Rate (Month 12)	**₹ 53.4 Crores**	Annualized GMV based on Q4 velocity.
Total Units Sold	**2.05 Million**	Aggressive penetration via 1,000 Dark Stores.
Gross Margin (Product)	**66%**	Cost of production vs. MRP.
Monthly Burn Rate	**₹ 19.3 Lakhs**	Includes Aggressive Marketing + "A-Team" Salaries.
Breakeven Horizon	**Month 18-20**	Profitability expected once volume crosses 2.5M units/year.
Capital Ask	**₹ 3.5 Crores**	18 Months Runway.

---

2. Unit Economics:

SKU: 60g Standard Pack (Ghost Pepper/Wasabi) | **MRP:** ₹99.00

Line Item	Amount (₹)	% of MRP	Notes
MRP (Customer Pays)	**₹ 99.00**	**100%**	
(-) Platform Margin	₹ 34.65	35%	The "Q-Comm Tax" (Standard Category avg).
Net Realization (Pre-Tax)	**₹ 64.35**		Amount credited to Brand.
(-) COGS (Manufacturing)	₹ 33.00	33%	Includes Makhana, Seasoning, Pouch, Mfg Fee.
Gross Contribution	**₹ 31.35**	**31%**	
(-) Variable Marketing (Ads)	₹ 6.00	~6%	Estimated CAC amortized per unit at scale.
(-) Logistics / Packing	₹ 3.00	~3%	Last-mile / 3PL handling costs.

Net Contribution (CM2)	**₹ 22.35**	**~22%**	**Contribution toward Fixed Costs.**

Note: Q-Comm margins are tight, ₹22.35 contribution covers our fixed burn. D2C Bundles (Average Order Value ₹599) yield a significantly higher Net Contribution (~₹84 per order), which subsidizes the Q-Comm acquisition.

---

3. Sales & Revenue Projections (Quarterly View)

Reconciled Math: 1,000 Stores × 15 Units/Day × 90 Days = Q4 Volume.

Period	Stores	Velocity (Units/Day)	Total Units	GMV (Gross Sales)	Net Revenue (@39%)
Q1	50	5	22,500	₹ 22.28 Lakhs	₹ 8.68 Lakhs
Q2	200	8	144,000	₹ 1.42 Crores	₹ 55.3 Lakhs
Q3	500	12	540,000	₹ 5.34 Crores	₹ 2.08 Crores
Q4	1,000	15	1,350,000	₹ 13.36 Crores	₹ 5.21 Crores
Total	**1,000**	**-**	**2,056,500**	**₹ 20.36 Crores**	**₹ 7.94 Crores**

---

4. Breakeven Analysis

Volume needed to cover our monthly burn?

1. **Total Monthly Fixed Burn: ₹ 19.30 Lakhs**
    - *(Includes: Salaries ₹4.7L, Marketing Budget ₹12L, Rent/Ops ₹2.6L)*
2. **Net Contribution Per Pack: ₹ 22.35**
    - *(From Unit Economics table above)*

$$Breakeven\ Volume\ =\ Monthly\ Burn/Contribution\ per\ pack$$
$$= \frac{19{,}30{,}000}{22.35}$$
$$=\ 86{,}353\ Packs/Month$$

At 500 Stores: We need sales of **5.7 packs/store/day** to break even.

- **At 1,000 Stores:** We need sales of **2.9 packs/store/day** to break even.
- **Current Target:** Our model projects **15 packs/store/day**.
- The target velocity provides a **5x safety margin** over the breakeven requirement once fully distributed.

---

5. Sensitivity Analysis (Risk Modelling)

We have modelled three scenarios to demonstrate resilience against cost fluctuations.

Scenario	COGS (₹)	Marketing/Logistics (₹)	Net Contribution (₹)	Breakeven Vol (Units/Mo)
Best Case	₹ 28.00	₹ 4.00	**₹ 32.35**	**59,600**
Base Case	₹ 33.00	₹ 9.00	**₹ 22.35**	**86,350**
Worst Case	₹ 36.00	₹ 15.00	**₹ 13.35**	**144,500**

Note: Even in the "Worst Case" (High COGS + Expensive Ads), we break even at ~1.45 Lakh units/month, which is well within our Year 1 projection of ~1.7 Lakh units/month average.

---

6. Operating Model & Fixed Expenses

VC-Funded Structure: Lean Ops, Heavy Growth.

A. Core Team Salaries (Monthly)

Role	Salary (₹)	Role Description
Founder (CEO)	1.1 L	Strategy & Key Accounts.
Head of Growth	1.1 L	Performance Marketing & Funnel.
Creative Lead	0.9 L	Brand Aesthetics & Content.
Ops Manager	0.8 L	Supply Chain & Co-Man.
Community Mgr	0.8 L	Streamer Relations & Discord.
Total Payroll	**~ 5.0 Lakhs**	

B. Operational Expenses (Monthly)

Expense Head	Cost (₹)	Notes
Marketing (Ads)	12.0 L	60% Q-Comm Search / 40% Brand Awareness.
Warehousing (3PL)	1.5 L	Variable with volume.
Tech/Office/Legal	1.1 L	Shopify, Rent, FSSAI compliance.
Total OpEx	**14.6 Lakhs**	

Total Monthly Burn: ₹ 19.3 Lakhs

---

7. Key Risks & Mitigations

1. **Risk: High CAC (Customer Acquisition Cost)**
    - **Mitigation:** We are not relying solely on paid ads. Our **Community Strategy** (Discord, Campus Ambassadors, Streamer Collabs) drives organic traffic. We also use **D2C Bundles** to increase Average Order Value (AOV), ensuring the CAC is absorbed by a ₹599 cart, not a ₹99 packet.
2. **Risk: Q-Commerce Margin Squeeze**
    - **Mitigation:** We view the 35% Q-Comm margin as a "Marketing Cost" for discovery. As brand loyalty grows, we will migrate repeat users to our **D2C Subscription Model** for better margins.
3. **Risk: Inventory Capital Lock**
    - **Mitigation:** We have allocated **20% of the raise (₹70L)** specifically for Working Capital to handle the 30-45 day payment cycles of platforms like Blinkit/Zepto.

---

8. Capital Requirement

Total Ask: ₹ 3.5 Crores

Runway: 18 Months

- **Growth (45%):** Aggressive Q-Comm bidding & Influencer Marketing.
- **Team (25%):** Hiring the "A-Team" to execute the Cyberpunk vision.
- **Inventory (20%):** Working capital for scale.
- **Product/Capex (10%):** R&D and One-time setup costs.
